

**OSCAR  
ROMERO  
SIXTH FORM  
CENTRE**

# Biology

## Why study Biology ?

Biology is supremely relevant to everybody, and it is of vital importance in any understanding of the world around us. We may even depend on a knowledge of Biology for our very survival.

Add to this its intrinsic fascination, and it is hard not to become hooked.

Studying in The Oscar Romero centre will give you the opportunity to ask any questions freely in a friendly setting. You will be known personally by your tutors, and always encouraged to reach your full potential.

Past students have gone on to study medicine, veterinary science, genetics, and environmental science, to name just a few.

## The Course

The course is made up of six modules — three taken in each year.

### Year 12 AS

Module 1 — Biochemistry and cells

A 1 hour 30 min. exam is taken in January '10

Module 2 — Biodiversity and body systems

A 1 hour 30 min. exam is taken in June '10

Module 3 — Investigative and practical skills

Completed within the course.

### Year 13 A2

Module 4 — Metabolism and microbiology

A 1 hour 45 min. exam in January '11

Module 5 — Environment and evolution

A 1 hour 45 min. exam in June '11

Module 6 — Investigative and practical skills

Completed within the course.
